SECTION 6 · **PROJECT BUDGET**

To fill out the following budget worksheet, first list each work element you identified in Section 5. For each work element, list the total estimated construction costs and budget contingencies under "Expenses". Under the "Income" section, list how you plan to cover the expenses for each work element with any combination of grant funds, cash, prior capital expenditures, or in-kind match. Below the work element totals, enter the same information for the architecture & engineering fees, which cannot be covered by grant money. **When completed, please save and upload to the online application form.**

	Enter the estimated construction cost of each work element.	*Enter the contingency for which you are budgeting for each work element.*	*Enter the amount of grant funds the county plans to put toward each work element.*	*Enter the amount of cash the county plans to put toward each work element.*	*Enter the amount of prior capital expenditures the county has made toward each work element.*	*Enter the dollar value of the in-kind match you plan to put toward each work element.*
